Skilled craftsmanship and attention to detail help ensure a successful fitout, says Amstar Interiors.

Amstar directors point out that the company has a skilled workforce with the experience to accommodate the unusual design requests and diverse range of materials specified by designers. This was the case with the Hewitt Associates fitout, designed by Creative Spaces, where Amstar helped to create an atmospheric reception area as well as practical office space.

With its relocation to Maritime Square in Auckland, Hewitt Associates needed a new office fitout. Amstar Interiors successfully secured the contract for this job and worked closely with designers Creative Spaces.

Starting with an empty shell, Amstar worked to create an atmospheric reception area as well as practical office space in a fitout that was completed in just eight weeks.
