

Village Cinema Complex

LOCATION
St Lukes, Auckland

ARCHITECT
Walker Architects

www.amstar.co.nz

One of the largest projects ever undertaken by Amstar was the fitout of the new Village SkyCity Cinema Complex at Westfield St Lukes.

The eight-screen cinema, with a total seating capacity of 1650, is the final stage of a \$55 million redevelopment of the shopping mall. It features state-of-the-art digital sound and screen technology, stadium-style seating, a spacious foyer, a private function room, an interactive games area, and a licenced bar.

Taking on an overall management role, Amstar worked closely with the client, Walker Architects and numerous subcontractors to enable the cinema to open two weeks ahead of schedule.
